

Make Your Warehouse Operation More Efficient

Using the lithium ion powered Heli CPD25SQ forklift

HELI

This forklift lets you work longer on each charge because it has a larger battery capacity than previous models. Plus, with a lithium ion battery, you can charge your forklift eight times faster than a lead acid battery with no cool down period after charging.

Lithium ion battery and charger included!

Is Your Forklift Ready for Fall Weather?

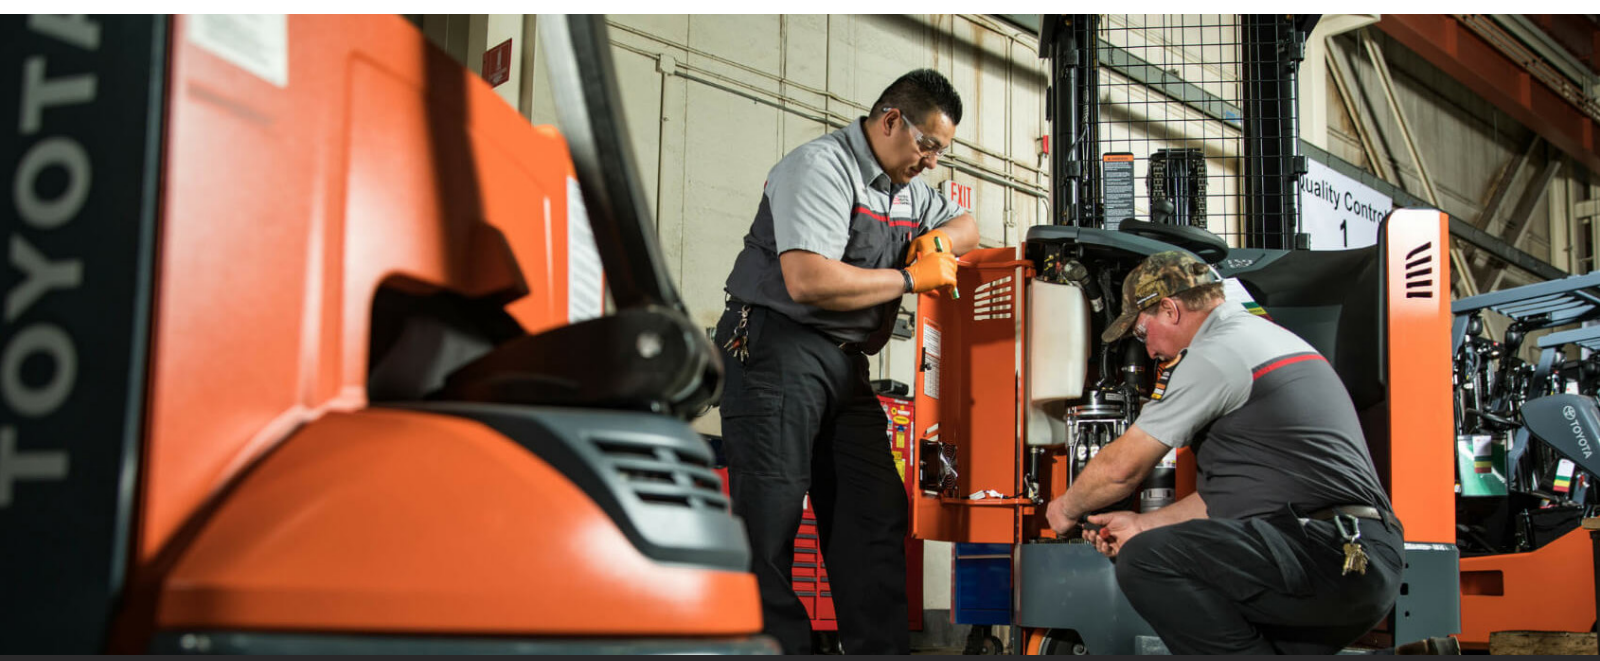

We have what you need

If your forklift tires are worn down or don't have much tread left, then you should replace them with new tires before wet, icy winter conditions start. In addition to new tires, we also offer forklift tire chains for even more traction.

Check CO2 Levels prior to Working Indoors

Our team will conduct a test

Before using your forklift indoors, it's important to have our team conduct a CO2 emissions test to make sure the levels are not dangerously high.
