

Pay a Flat Rate to Maintain Your Forklift

With a full maintenance plan from JIT

Our team will take care of everything, from routine inspections and fluid changes, to repairs resulting from normal wear and tear. No quotes or bills to review—all you have to do is pay a predictable, flat rate monthly fee. It's that simple!

Can You Drive Electric Forklifts Outside?

Check the IP code

Prior to using your electric forklift on outdoor projects, you have to first check its two digit IP code, commonly found on its rating plate. If you're using your electric forklift outdoors, we recommend a rating of at least IP54 to ensure it will be protected from dusty environments and water splashing from any direction.

Toyota 360 Maintenance Program

We support you through the life of your machine

The Toyota 360 program helps you get the most from your forklift with regular maintenance and repairs. You'll always have Toyota certified technicians, Toyota genuine parts, and access to Toyota standard and Extra Care warranty programs.

Don't Let a Down Machine Keep You from Working

We offer rentals by the hour

If your machine needs a repair that requires a shop visit, you can rent a comparable machine from our fleet by the hour while yours is being serviced.
