

Help Us Celebrate 40 Years in Business!

With our 40th anniversary charity Give Back Event

We're inviting charities operating in Erie, Niagara, Wyoming, Chautauqua, Cattaraugus, and Allegany counties to apply to receive one of twelve Heli semi-powered hand pallet jacks. If you know of any non-profits or charities in these areas that would benefit from having a pallet jack, then please spread the word and send them our application!

Charities need to fill out the application by May 31 to participate. Winners will be selected by a committee of JIT employees.

May the Forks Be with You

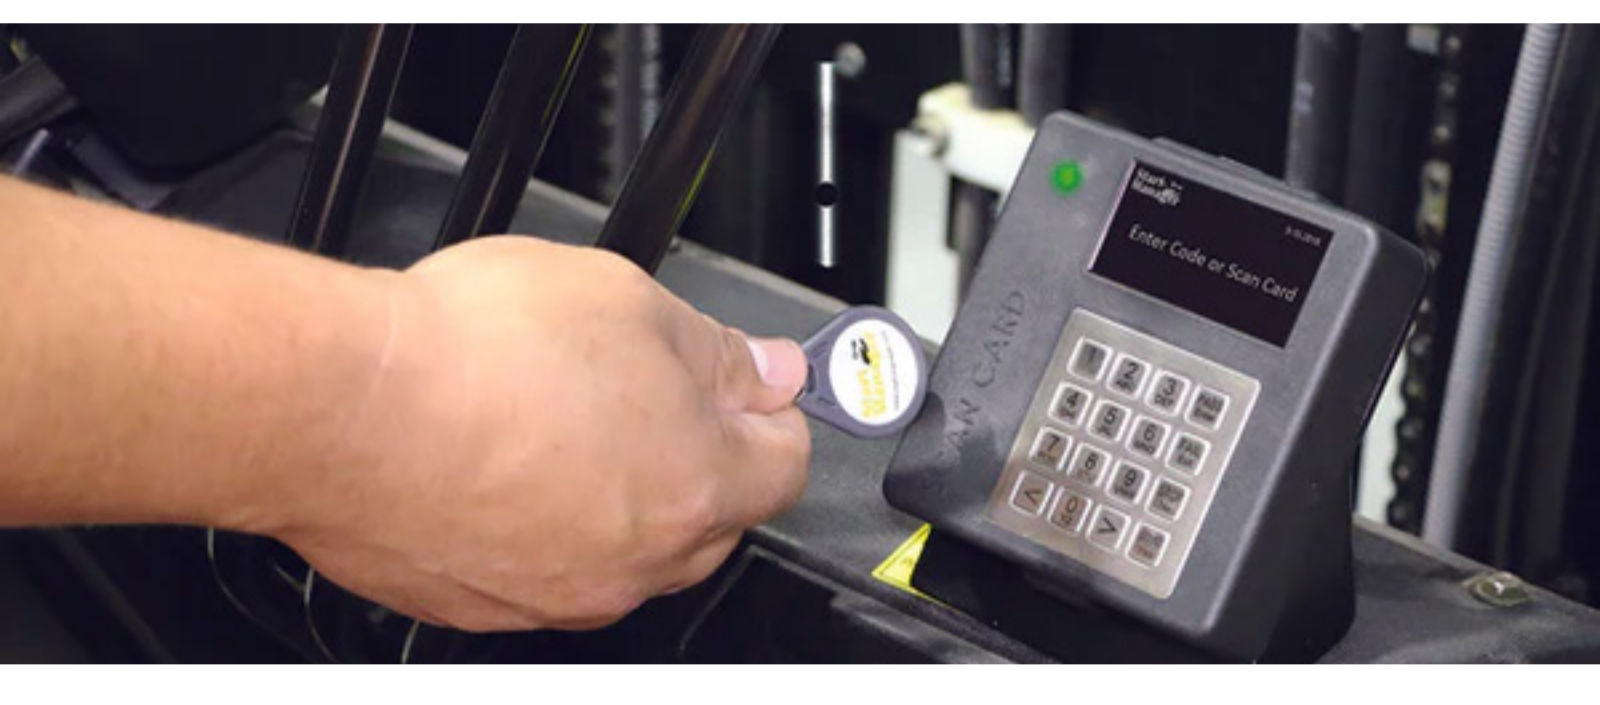

We're offering free fork inspections PLUS discounts on replacements

At JIT, our tradition of "May the Forks Be with You" brings together forklifts, Star Wars, and the month of May. Part of this tradition is providing free annual fork inspections for your forklifts. After the inspection, we'll give you discounts on replacement forks.

Reduce the Chance of Forklift Accidents

Using the Liftow Start Manager

The Liftow Start Manager helps owners and managers hold operators accountable for incidents or driving equipment irresponsibly. Once installed on your forklift, this device controls access to the machine, lets you know who is operating it and at what time, and requires safety checks to be completed before the forklift can be operated. Improving accountability helps to lower the rate of incidents for your warehouse.

Our team provides custom solutions and consultations for all your warehouse needs.

Save Big on Forklift Parts

When you choose remanufactured over new

Our remanufactured parts are completely disassembled, cleaned, inspected, re-engineered and rebuilt with new components to meet OEM specifications. All components are tested to assure that specifications are met.

Best Practices

Fleet Management Tips

Conduct routine fluid analysis

Sampling fluids to compare contaminant levels to normal wear rates helps identify potential problems before a major failure occurs. Routine fluid analysis is a proactive measure to avoid unnecessary downtime and costly repairs.

Choose the Best Forklift for Your Needs

From our used equipment inventory

We have a large number of used forklifts in stock, so you can find the best one for your operation. If you don't see what you need, tell us what you're looking for, and we'll do our best to help you locate it.
