

Improve Your Warehouse Operation

We have racking and docking equipment in stock

We carry a variety of pallet rack systems and flow racking technology that allow for increased vertical and horizontal storage, opening up more space for product. We also offer dock seals, shelters, and levelers to make loading and unloading easier and protect products from outside contaminants.

Our team can look at your current setup and suggest ways to improve space utilization, loading operations, and more.

Have Unused Space in Your Facility?

We'll help you take advantage of it

We build custom, innovative solutions that maximize your storage capabilities and productivity.

Recently, we had a customer who had unused space in the basement of their building, but they had no way to get down there. There was an old elevator shaft that reached the basement, but no elevator. Our team took a look at it and determined that a mezzanine lift would work in the space. Now this customer has double the storage capacity.

The JIT Advantage

We offer complete warehouse solutions

At JIT, we provide everything you need to make your warehouse more efficient and effective, from forklifts to pallet trucks to racking to lifts, and more. Plus, our team is highly experienced and can create custom solutions to meet your specific needs. More than just selling forklifts, we can consult you on the best way to organize your operation.
