

# We're Here to Help!

## Tell us your specific needs, and we'll find a solution

Our goal is to make your operation run as smoothly and efficiently as possible, which is why we go the extra mile for our customers. We provide obscure attachments and will even customize equipment to solve *any* problem.

For example, we recently worked with a contracting company who was from out of town. They were having carpet delivered and needed a carpet pole attachment for their boom lift. Our team was able to find one and have it delivered right to their jobsite within a week, before their carpet was delivered.

**If you can't find a solution or product anywhere else, JIT has it.**

### Best Practices

## Forklift Tire Tips

### Signs you need to replace your tires

If your forklift tires are falling apart, have flat spots, or if they are worn down past their wear line, then it's time to replace them.
