

How to Clean Floors More Efficiently

JIT has a wide variety of Tennant options in stock now

Whatever type of facility you have or what your floor cleaning needs are, we have scrubbers and sweepers in stock to help reduce man hours to complete the job faster. Choose from Tennant autonomous scrubbers, ride-on or stand-on scrubbers and sweepers, and combination sweeper scrubbers.

Our team will review your operation and recommend the options that will work best for you!

Best Practices

How to Prevent Equipment Theft

Secure your equipment storage area

When storing your equipment, ensure the area you place it in is either a locked section of your warehouse, if stored inside, or within a fence that's at least eight feet tall, if stored outside. If using fencing, we recommend adding razor or barbed wire at the top. Whether storing inside or outside, it's best that the area has only one way in and out, and that you conduct routine inspections to check for damage.

Avoid Costly Forklift Downtime

Use genuine Toyota filters and fluids from JIT

Toyota filters are high quality and two stage, allowing them to remove more impurities from your oil than a single stage filter, preventing excessive engine wear and downtime.
