

Lithium Batteries Reduce Downtime and Let You Work Longer

Schedule a consultation to see if they are right for you

NEXSYS® ion batteries are designed specifically to replace traditional lead acid batteries in forklifts and other material handling equipment. They are ideal for heavy duty applications, because they require virtually no maintenance or downtime for watering, they charge fast, and they deliver longer run times than lead acid batteries.

Our team will look at your operation and help you determine whether a lithium ion battery will help you increase productivity and profitability.

Now Is the Time for New Forklift Tires

So your outdoor lifts are ready for winter conditions

If your tires are worn down or don't have much tread left, then we recommend replacing them before the ground becomes wet, icy, and slippery. In addition to new tires, we also offer forklift tire chains for even more traction.

Do You Have a Multi Shift Operation?

Use the lithium ion powered Heli CPD25SQ forklift

This forklift can lift 5,000 lb and lets you work longer on each charge because it has a larger battery capacity than previous models. Plus, with a lithium ion battery, you can charge your forklift eight times faster than a lead acid battery with no cool down period after charging.

Lithium ion battery and charger included!

**Subject to prior sale*
