How to Move Your Heaviest Loads Fast

Toyota Core IC Cushion and Pneumatic 8FGCU25 forklifts

Travel at a max speed of 10.6 MPH carrying loads up to 5,000 lb with the 8FGCU25. Plus, help prevent accidents using its Active Control Rear Stabilizer that automatically responds to fast turns by widening the forklift's center of gravity to avoid tip overs.

Best Practices

Forklift Lubrication Tips

Always purge old grease

Whenever you transition from one type of forklift grease to another, be sure to purge the previous grease. Mixing old and new products, which may not be compatible, can potentially lead to serious complications for your equipment.

More Capacity. Higher Speeds. Unmatched Efficiency.

The Toyota 8HBW23 Electric Walkie Pallet Jack

Move pallets with speed and precision around your warehouse. The 8HBW23 is zero turn, has a max load capacity of 4,500 lb, and can travel fully loaded at 3.6 MPH. Maneuver with precision on delivery tailgates and crowded docks using its Click-To-Creep function that allows extremely smooth low speed control.
