

KEEP YOUR TOYOTA A TOYOTA.

We Are Toyota ASEC Certified

You can rely on us to get you back to work

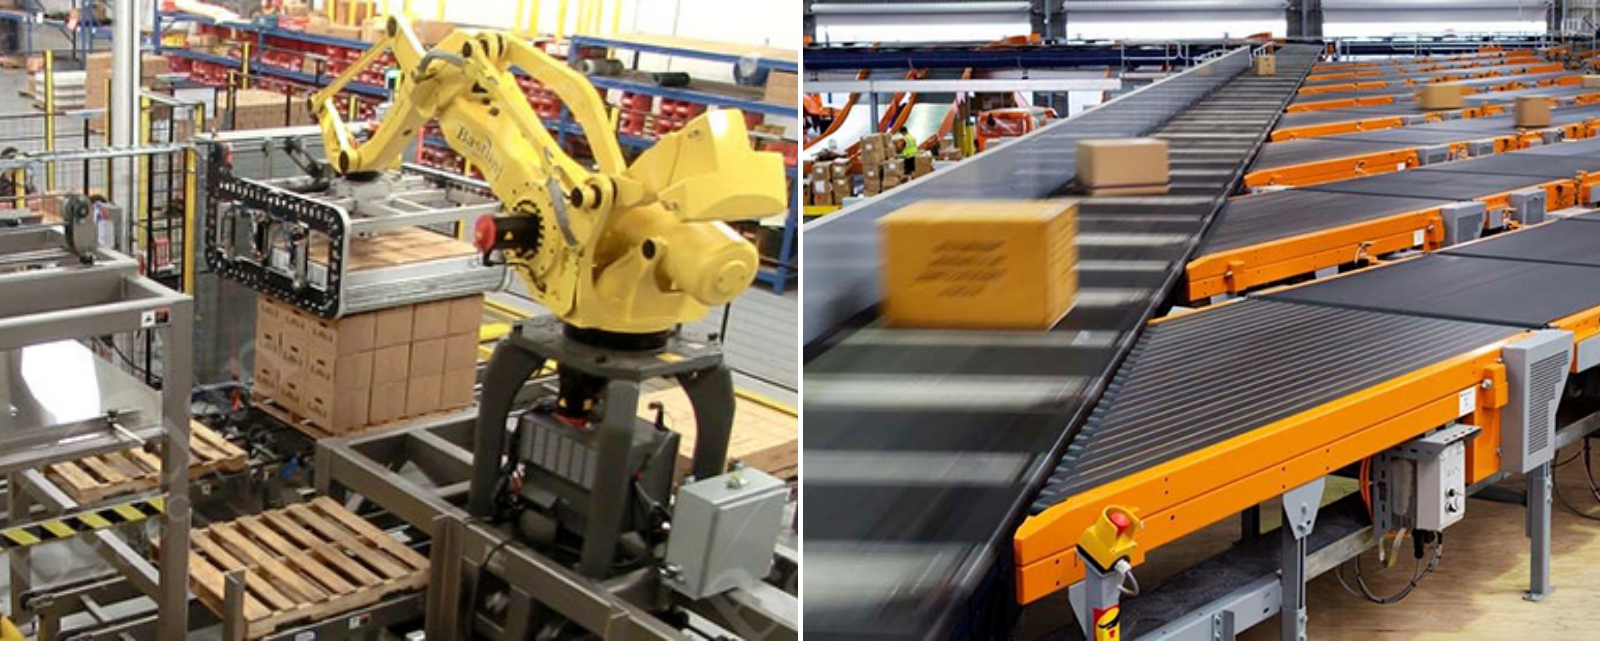

Toyota's After Sales Service Evaluation and Certification (ASEC) program scores a dealer's entire operation, from processes, quality of work, service vehicles, and parts storage, all the way to customer communication, workspace cleanliness, and more. Dealerships must score a 90% on the final evaluation in order to be certified.

At JIT, you can trust that we will accurately assess and repair your machines, have all the required equipment to complete the job, and that we'll always follow up and keep you informed on our progress.

Stop by our facilities any time to see how efficient, organized, and effective we are at providing the services you need.

Tips for Automating Your Facility

Know when to add automation

Before considering any level of automation it's important to evaluate your processes and procedures, examine your supply chain, and identify gaps or chokepoints in your operation.

Here are several questions to ask yourself to help determine if you would benefit from automation:

1. Are your current warehouse practices labor intensive?
2. Do consistent labor shortages lead to delays?
3. Is your order fulfillment capacity declining?
4. Are customer satisfaction surveys indicating issues with order fulfillment?
5. Do you regularly need to increase or decrease your workforce to meet fluctuations in demand?
6. Do you often have out of stock items?

Talk to our team about adding automation today!
